Второй из них, как мы видели, имеет вид $\frac{1}{2} \frac{d^2 \phi}{dt^2} = -\frac{1}{2} \frac{d^2 \phi}{dt^2}$, откуда $\frac{d^2 \phi}{dt^2} = 0$, т. е. $\phi = at + b$, где a и b — произвольные постоянные. Это решение удовлетворяет уравнению (11.1) и граничным условиям (11.2). Следовательно, оно является решением задачи. Таким образом, решение задачи (11.1)–(11.2) имеет вид $\phi = at + b$.

§ ☒ ☒

1. The first step is to identify the key components of the system. This involves understanding the hardware and software involved, as well as the data flow and the roles of the various components.

2. The second step is to analyze the system's performance. This involves measuring the system's response time, throughput, and other performance metrics. This analysis helps to identify bottlenecks and areas for improvement.

3. The third step is to optimize the system. This involves making changes to the hardware and software to improve performance. This can include upgrading hardware, optimizing code, and reconfiguring the system.

4. The fourth step is to test the system. This involves running tests to verify that the system is working correctly and that the optimizations have been implemented correctly.

5. The fifth step is to deploy the system. This involves installing the system on the target hardware and making it available to users.

6. The sixth step is to monitor the system. This involves keeping an eye on the system's performance and making adjustments as needed.

7. The seventh step is to maintain the system. This involves keeping the system up-to-date with the latest software and hardware.

8. The eighth step is to document the system. This involves creating a detailed record of the system's configuration, performance, and maintenance.

9. The ninth step is to train the users. This involves teaching users how to use the system and how to troubleshoot common problems.

10. The tenth step is to evaluate the system. This involves assessing the system's overall performance and determining whether it meets the requirements.
